 삭제하기

❖ django 프로젝트 process

- 1. projects 디렉터리 하위에 bookmark 디렉터리에 만들기 (mysite) > C:\projects>mkdir bookmark
- 2. bookmark 디렉터리에 새 프로젝트 config 앱 설치하기

 (mysite) > C:\projects\ bookmark >django-admin startproject config .
- 3. 서버를 구동해서 127.0.0.1:8000 페이지 확인
 - (mysite) > C:\projects\ bookmark > python manage.py runserver

❖ django 프로젝트 process

- 4. DB 사용을 위한 migrate 실행하기
 (mysite) > C:\projects\ bookmark > python manage.py migrate
- 5. 관리자 페이지 사용을 위한 슈퍼유저 생성하기

 (mysite) > C:\projects\ bookmark > python manage.py createsuperuser
- 6. bookmark 앱 생성하기

(mysite) > C:\projects\ bookmark > django-admin startapp bookmark

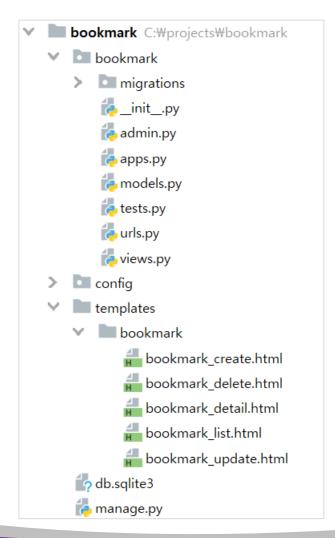

bookmark config/settings.py

```
LANGUAGE_CODE = 'ko-kr'

TIME_ZONE = 'Asia/Seoul'
```

```
INSTALLED_APPS = [
   'bookmark',
   'django.contrib.admin',
   'django.contrib.auth',
```

❖ bookmark 프로젝트 구성도

❖ bookmark 모델(model)

```
from django.db import models

class Bookmark(models.Model):
    site_name = models.CharField(max_length=100)
    url = models.URLField('Site Url')

def __str__(self):
    return "이름 : " + self.site_name + ", 주소 : " + self.url
```

bookmark config/urls.py

```
from django.contrib import admin
from django.urls import path, include

urlpatterns = [
    # 127.0.0.1/admin
    path('admin/', admin.site.urls),
    # 127.0.0.1/bookmark
    path('bookmark/', include('bookmark.urls'))
]
```

❖ bookmark URL 매팅 – bookmark/urls.py

```
app_name = 'bookmark'
urlpatterns = [
   # 북마크 목록 - 127.0.0.1/bookmark
   path('', BookmarkList.as_view(), name='list'),
   # 북마크 추가 - 127.0.0.1/create
   path('create/', BookmarkCreate.as_view(), name='create'),
   # 상세 페이지 - 127.0.0.1/2
   path('<int:pk>/', BookmarkDetail.as_view(), name='detail'),
   # 북마크 수정 - 127.0.0.1/update
   path('update/<int:pk>/', BookmarkUpdate.as_view(), name='update'),
   # 북마크 삭제 - 127.0.0.1/delete
   path('delete/<int:pk>/', BookmarkDelete.as_view(), name='delete'),
```

❖ bookmark view 함수

```
class BookmarkList(ListView):
   model = Bookmark
class BookmarkCreate(CreateView):
    model = Bookmark
   fields = ['site_name', 'url']
   # 성공했을때 페이지 이동(redirect)
    success_url = reverse_lazy('bookmark:list')
   template_name_suffix = '_create' # suffix: 접미사
class BookmarkDetail(DetailView):
    model = Bookmark
class BookmarkUpdate(UpdateView):
   model = Bookmark
   fields = ['site_name', 'url']
    success_url = reverse_lazy('bookmark:list')
   template_name_suffix = '_update'
class BookmarkDelete(DeleteView):
   model = Bookmark
    success_url = reverse_lazy('bookmark:list')
```

❖ bookmark 템플릿 – bookmark_list.html

```
<a href="{% url 'bookmark:create' %}">북마크 추가</a>
<thead>
     #SiteURL수정삭제
     </thead>
  {% for bookmark in object_list %}
     {{ forloop.counter }}
        <a href="{% url 'bookmark:detail' pk=bookmark.id %}">{{ bookmark.site_name }}</a>
        <a href="{{ bookmark.url }}" target="_blank">{{ bookmark.url }}</a>
        <a href="{% url 'bookmark:update' pk=bookmark.id %}">수정</a> 
        <a href="{% url 'bookmark:delete' pk=bookmark.id %}">삭제</a> 
     {% endfor %}
```

bookmark_detail.html

```
<h3> 사이트 이름 : {{ object.site_name }} </h3><h3> 사이트 주소 : {{ object.url }}</h3>
```

bookmark_create.html

```
<form action="" method="post">
    {% csrf_token %}
    {{ form.as_p }}
    <button type="submit">추가하기</button>
</form>
```

bookmark_update.html

```
<form action="" method="post">
    {% csrf_token %}
    {form.as_p }}
    <button type="submit">수정하기</button>
</form>
```

bookmark confirm delete.html

```
<form action="" method="post">
    {% csrf_token %}
    {{ object }}를 정말로 삭제 하시겠습니까?
    <button type="submit">삭제하기</button>
</form>
```

반드시 이름은 bookmark_confirm_delete 로 해야함

TemplateDoesNotExist at /bookmark/delete/4/

bookmark/bookmark_confirm_delete.html

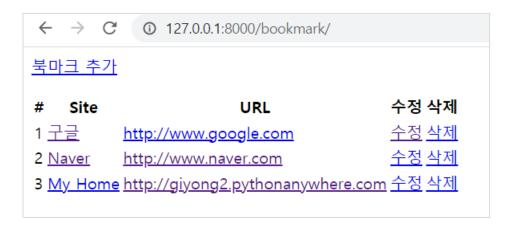

Request Method: GET

Request URL: http://127.0.0.1:8000/bookmark/delete/4/

Django Version: 3.2

Exception Type: TemplateDoesNotExist

1. front 앱 생성하기

(mysite) > C:\projects\ bookmark > django-admin startapp front

2. config/urls.py 에 등록하기

```
| urlpatterns = [
    # 127.0.0.1:8000/admin
    path('admin/', admin.site.urls),
    # 127.0.0.1:8000/bookmark
    path('bookmark/', include('bookmark.urls')),

# 127.0.0.1:8000/
    path('', include('front.urls'))
```

3. Index페이지 URL 매핑하기 - front/urls.py

```
from django.urls import path
from . import views

app_name = 'front'

urlpatterns = [
    path('', views.index, name='index')
]
```

4. index 함수 정의하기 - front/views.py

```
from django.shortcuts import render

def index(request):
    return render(request, 'front/index.html')
```

5. 템플릿 만들기 – templates/front/index.html
